# **HAZARDOUS COMPONENTS**

Specific protein (s) as listed on the vial label. Solutions are at a concentration generally greater than 0.5mg protein / ml. Powders are generally greater than 95% specific protein unless otherwise indicated on the vial label or product information sheet. Biological activity of these proteins will vary. Although these materials are not generally considered to be hazardous they may cause allergic responses in sensitive individuals if inhaled or allowed to contact skin.

#### **HEALTH HAZARD INFORMATION**

EXPOSURE LIMITS: None established. The toxicological properties of these products have not

been thoroughly investigated. Care should be taken when handling any of

these materials.

EFFECTS OF Any of these proteins may cause acute localized eye, skin, or mucous

OVEREXPOSURE: membrane irritation. Some sensitive individuals may develop a chronic

allergic reaction with exposure.

ROUTES OF Inhalation of powders and skin contact with liquids are the primary routes of

EXPOSURE: exposure. Care should be taken to avoid the formation of aerosols when

handling any of the solutions.

#### PHYSICAL CHARACTERISTICS

APPEARANCE: Powders may be white to amber brown in color. Solutions may be translucent

to a clear brown

SOLUBILITY: Powders are completely soluble in many biological buffers. Some are soluble

in water. All liquids are completely miscible in water and biological buffers

FIRE AND EXPLOSION HAZARDS

Not considered to be a fire hazard.
