## **PRODUCT INFORMATION FITC Labeled Lectin**

	Catalog Number:	E 2501 2		The following is a general Procedure and Trouble-Shooting Guide. The information is provided only for your convenience. The success of your experiments are not guaranteed by EY Laboratories, Inc.		
	Catalog Nulliber:	F-3501-2		Tissue Sections		
	Description:	Pure Salvia sclarea lectin (SSA), FITC conjugated.		<ol> <li>Wash and block tissue section. Do not use serum products, they contain glycoproteins which may lead to high levels of non specific background. After blocking, rinse briefly with Buffer (See reverse side).</li> <li>Dilute Fluorescent Labeled Lectin to desired concentration 20-100 μg/ml using Buffer.</li> <li>Incubate tissue section with Fluorescent Labeled Lectin for 30 minutes in a moist chamber.</li> </ol>		
	Lot Number:				section with Buffer three times.	50 minutes in a moist chamber.
					ue section with Fluorescent microscope. Use a	appropriate filter.
	Protein Concentration: (Based on OD 280)	2 mg purified SSA FITC/ 2 ml Buffer.		Ref. M. Imm	bar et. al., (1973). Intnl. Journal of Cancer, 12	
	(20000 011 02 200)			Cell Suspension		
	FITC / Protein Ratio:				ith Buffer (See reverse side.) by centrifugation.	
	(OD 495/ OD 280)					ffar
	Purification Procedure:	Gel filtration performed after conjugation to remove free FITC		<ol> <li>Dilute Fluorescent Labeled Lectin to 100 μg/ml using Buffer.</li> <li>Incubate approximately 1x10<sup>6</sup> cells with 1 ml diluted Fluorescent labeled Lectin for 15 minutes at room temperature or in a 37°C water bath.</li> </ol>		
				5. Wash cells w	ith Buffer three times using centrifugation.	
		N-Acetylgalactosamine. Terminal GalNAc linked to serine (or t	threonine).	6. Examine cells, with or without fixation with Fluorescent microscope. Use appropriate filter.		
	Specificity:			Ref. K. Phiss. (1977). Experimental Pathology, 14, S15		
	Inhibitory	N-Acetylgalactosamine.		Fluorochromes m covered in foil.	ust be protected from light. Perform incub	ation, when practical, in a dark room or
	Carbohydrate:			covereu in ion.		
					Absorption and Emi	
	Activity:	Reacts weakly with neuraminidase treated cells.		FI	Absorption/Excitation Rat C 492 nm	te Emission Max. 517 nm
					ITC 554 nm	570 nm
	Buffer:	0.01M Phosphate - 0.15M NaCl, pH 7.2 - 7.4. Contains 0.05	5% sodium azide as a	Te	as Red <sup>TM</sup> 596 nm	615 nm
		preservative.			Carbohydrate Inhib	bition
	Chemical Used for Conjugation:	Fluorescein Isothiocyanate, FITC.		Inhibition of lectin	binding may be accomplished by using one of	two procedures:
						incubate section or cells with inhibitory
	Storage:	Store liquid material frozen in aliquots in amber vials or covered with foil. Avoid B. Preincubate diluted Fluorescent I		for 30-60 minutes at room temperature. NOT diluted <b>Fluorescent Labeled Lectin</b> with in ature before applying to section or cells.	om temperature. NOTE: Complete inhibition may NOT occur. <b>beled Lectin</b> with inhibitory carbohydrate for 30-60 minutes at section or cells.	
					TROUBLE SHOOTING	GUIDE
	Stability:	The liquid material is stable for at least 1 year when stored from 0.05% sodium azide added as a preservative.	ozen in anquois with	Problem	Cause	Solution

## **MATERIAL SAFETY DATA SHEET**

Effective Date: March 31, 2006 Revision 4 Page 1 of 2

## **PRODUCT IDENTIFICATION**

Name:	Purified proteins labeled with fluorescein isothiocyanate (FITC), tetramethylrhodamine isothiocyanate (TRITC), or Texas Red a trademark of
	Molecular Probes for the sulforvl chloride derivative of sulforhodamine 101
	· · · · · · · · · · · · · · · · · · ·
Catalog	FP-01, RP-01, TP-01, F-1102 to F-9000, R-1102 to R-9000, T-1102 to T-9000, FA-
Number (s):	2100 to FA-2701, RA-2100 to RA-2701, TA-2100 to TA-2701, FAF-001 to FAF-
	2354, RAF-001 to RAF-2354, TAF-001 to TAF-2354, FAL-1104 to FAL-4701,
	RAL-1104 to RAL-4701, TAL-1104 to TAL-4701, FA-01 to FA-013, TA-01 to
	TA-013, DM1011F to DM1064F, FNP-01 to FNP-05, BA-101, BA-102, BA-612.
Synonyms:	Protein A, Avidin (egg white), Glycosylated Bovine Serum Albumin, Lectins,
	Secondary and Monoclonal Antibodies labeled with FITC, TRITC, or Texas Red®

#### **EMERGENCY INFORMATION**

EY Laboratories, Inc. 107 North Amphlett Blvd. San Mateo, CA 94401 EMERGENCY PHONE: 650-342-3296

## HAZARDOUS COMPONENTS

Specific protein(s) as listed on the vial label. Solutions are at a concentration generally greater than 0.5mg protein/ml. Biological activity of these labeled proteins will vary. FITC, TRITC, and Texas Red $\circledast$  are possible carcinogens in their pure form. Compounds with similar chemical structures are known to be reactive with proteins and other biomolecules. The complete properties of the dyes after labeling have not been evaluated. These compounds should be treated as potentially hazardous. All solutions contain less than 0.05% sodium azide as a preservative.

### HEALTH HAZARD INFORMATION

EXPOSURE LIMITS:	None established. The toxicological properties of these products have not
	been thoroughly investigated. Care should be taken when handling any of these materials.
	these materials.
EFFECTS OF	Causes localized eye, skin, or mucous membrane irritation. Some sensitive
OVEREXPOSURE:	individuals may develop a chronic allergic reaction with exposure. The
	known effects are due to the protein. No specific effects of the bound dye are known at this time.
ROUTES OF EXPOSURE:	Inhalation of powders and skin contact with liquids are the primary routes of exposure. Care should be taken to avoid the formation of aerosols when handling any of the solutions.

### PHYSICAL CHARACTERISTICS

APPEARANCE: SOLUBILITY:

Powders are a light orange. Solutions will be yellow to dark purple. Powders are completely soluble in many biological buffers and water. Alliquids are completely miscible in water and biological buffers.

## FIRE AND EXPLOSION HAZARDS

Not considered to be a vire hazard. At high concentrations the chemicals may emit toxic fumes. Such high concentrations are not normally found in a research laboratory.

EXTINGUISHING MEDIA: SPECTUL FIRE FIGHTING CRECTULTIONS:

Dry chemical powder or CO<sub>2</sub>. Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

Orders: 1-800-821-0044 (Outside CA only)

## MSDS for Fluorescent labeled Purified Proteins Continued - page 2 of 2.

NOTE: Most solutions contain less than 0.05% sodium azide as a preservative. Azide may react with lead and copper plumbing to form explosive metal azides. Flush with copious amounts of water when disposing material in the sink.

## **REACTIVITY DATA**

STABILITY:		Stable. Decomposition products are not known to be hazardous.			
HAZARDOUS POLYMER	IZATION:	Will NOT occur.			
INCOMPATIBILITY:		Alcohols, strong bases and acids, strong oxidizing agents, and heat. (Lead and copper may react with sodium azide).			
SPILL / LEAK PROCEDURES					
MATERIAL RELEASE / SPILL:		with powder or liquid. Clean up spill with a paper towel sehold bleach. Do not allow solutions to dry on			
	environmental s	urfaces. Wash affected area with detergent after the area			
	has been treated				
WASTE DISPOSAL:	Incinerate, autoclave, or dispose of paper waste in accordance with all				
	material involve	d Federal regulations. Due to the small quantities of ed these products are generally not considered to be			
	environmental h	azards. All of these proteins are fully biodegradable.			

### EMERGENCY FIRST AID PROCEDURES

May be harmful if swallowed, inhaled, or allowed to absorb through the skin. Wash contacted area with water for 15 minutes. If inhaled remove to fresh air. Report exposure to the appropriate safety official. Consult a physician if irritation occurs or if there is any indication of an allergic response, such as watering eyes, sneezing, or difficulty breathing.

#### SPECIAL HANDLING PRECAUTIONS

VENTILATION:	No special ventilation is required but it is recommended to handle these		
	reagents in a fume hood when possible.		
EYE PROTECTION:	Required. Goggles or safety glasses with a side shield are recommended.		
RESPIRATORY PROTECTION:	Recommended as a safety precaution, specifically when working with powders. An approved respirator may be required for those individuals already known to be sensitive to these materials.		
PROTECTIVE GLOVES:	Required when handling any of these materials.		

## SPECIAL PRECAUTIONS

This material is for research and experimental application only. It is not intended for food, drug, household, agricultural, or cosmetic use. All materials should be handled only by technically qualified individuals experienced with working with potentially hazardous chemicals. The above information is correct to the best of our knowledge. The user should make independent decisions regarding completeness of the information, based on all sources available. EY Laboratories, Inc. shall not be held liable for any damage resulting from handling or contact with the above product.
