PRODUCT INFORMATION **FITC Labeled Lectin**

	Catalog Number:	F-5301-1		
	Description:	Pure Laburnum alpinum lectin (LAA) fr	om Scotch	laburnum.
	Lot Number:			
	Protein Concentration: (based on OD280)	1 mg/ml pure LAA / vial. Reconstitute 1 mg/1ml.	with Buffer	r to a concentration of
	FITC / Protein concentration: (OD 495/ OD 280) Purification Procedure:	Gel filtration performed after conjugation to re	emove free F	ITC.
	Carbohydrate Specificity:	N-Acetylglucosamine β (1,4) N-Acetylg	lucosamine	e.
	Inhibitory Carbohydrate:	N-Acetylglucosamine.		
	Activity:	At least 60 µg/ml is necessary in order with type O human erythrocytes. Only 2 neuraminidase treated red blood cells.		00
	Buffer:	0.01M Phosphate - 0.15M NaCl, pH 7 azide as a preservative.	7.2-7.4. Co	ontains 0.05% sodium
	Chemical Used for Conjugation:	Fluorescein Isothiocyanate, FITC.		
	Storage:	Store lyophilized powder refrigerated a frozen in aliquots. Avoid freeze-thaw cyc		
	Stability:	The lyophilized material is stable for se After reconstitution the material is stabl frozen in aliquots with 0.05% sodium azie	e for at lea	ast 1 year when stored
	Caution:	Refer to the enclosed MSDS for informatio scals have sharp edges and the vial itself may tors. Use caution when opening the vial.	n regarding have cracks	lectins. The aluminum s which can cause lacera-
	Remarks	Fluorescent Conjugates are extremely light ser	nsitive.

General Procedure Fluorescent Labeled Lectin

The following is a general Procedure and Trouble-Shooting Guide. The information is provided only for your convenience. The success of your experiments are not guaranteed by EY Laboratories, Inc.

Tissue Sections

1.		I ISSUE SECTION			
	Wash and block tissue section. Do not use serum products, they contain glycoproteins which may lead to high levels of non specific background. After blocking, rinse briefly with Buffer (See reverse side).				
2.	Dilute Fluorescent Labeled Lectin to desired concentration 20-100 µg/ml using Buffer.				
3.	Incubate tissue section with Fluorescent Labeled Lectin for 30 minutes in a moist chamber.				
4.	Wash tissue section with Buffer three times.				
5.	Examine tissue section with Fluorescent microscope. Use appropriate filter.				
	Ref. M. Imm	bar et. al., (1973). Intnl. Journal of Cancer, 12	, 93-99		
		Cell Suspension	n		
1.	Wash cells with Buffer (See reverse side.)				
2.	Collect cells by centrifugation.				
3.	Dilute Fluorescent Labeled Lectin to 100 µg/ml using Buffer.				
4.	Incubate approximately 1x10 ⁶ cells with 1 ml diluted Fluorescent labeled Lectin for 15 minutes at room temperature or in a 37°C water bath.				
5.	Wash cells with Buffer three times using centrifugation.				
6.	Examine cells, with or without fixation with Fluorescent microscope. Use appropriate filter.

MSDS for Fluorescent labeled Purified Proteins Continued - page 2 of 2.

MATERIAL SAFETY DATA SHEET

Effective Date: March 31, 2006 Revision 4 Page 1 of 2

PRODUCT IDENTIFICATION

Name:	Purified proteins labeled with fluorescein isothiocyanate (FITC),
	tetramethylrhodamine isothiocyanate (TRITC), or Texas Red a trademark of
	Molecular Probes for the sulfonyl chloride derivative of sulforhodamine 101
Catalog	FP-01, RP-01, TP-01, F-1102 to F-9000, R-1102 to R-9000, T-1102 to T-9000, FA-
Number (s):	2100 to FA-2701, RA-2100 to RA-2701, TA-2100 to TA-2701, FAF-001 to FAF-
	2354, RAF-001 to RAF-2354, TAF-001 to TAF-2354, FAL-1104 to FAL-4701,
	RAL-1104 to RAL-4701, TAL-1104 to TAL-4701, FA-01 to FA-013, TA-01 to
	TA-013, DM1011F to DM1064F, FNP-01 to FNP-05, BA-101, BA-102, BA-612.
Synonyms:	Protein A, Avidin (egg white), Glycosylated Bovine Serum Albumin, Lectins,
	Secondary and Monoclonal Antibodies labeled with FITC, TRITC, or Texas Red®

EMERGENCY INFORMATION

EY Laboratories, Inc. 107 North Amphlett Blvd. San Mateo, CA 94401 EMERGENCY PHONE: 650-342-3296

HAZARDOUS COMPONENTS

Specific protein(s) as listed on the vial label. Solutions are at a concentration generally greater than 0.5mg protein/ml. Biological activity of these labeled proteins will vary. FITC, TRITC, and Texas Red® are possible carcinogens in their pure form. Compounds with similar chemical structures are known to be reactive with proteins and other biomolecules. The complete properties of the dyes after labeling have not been evaluated. These compounds should be treated as potentially hazardous. All solutions contain less than 0.05% sodium azide as a preservative.

HEALTH HAZARD INFORMATION

EXPOSURE LIMITS:	None established. The toxicological properties of these products have not
	been thoroughly investigated. Care should be taken when handling any of
	these materials.
EFFECTS OF	Causes localized eye, skin, or mucous membrane irritation. Some sensitive
OVEREXPOSURE:	individuals may develop a chronic allergic reaction with exposure. The
	known effects are due to the protein. No specific effects of the bound dye are known at this time.
ROUTES OF	Inhalation of powders and skin contact with liquids are the primary routes of
EXPOSURE:	exposure. Care should be taken to avoid the formation of aerosols when
	handling any of the solutions.

PHYSICAL CHARACTERISTICS

 APPEARANCE:
 Powders are a light orange. Solutions will be yellow to dark purple.

 SOLUBILITY:
 Powders are completely soluble in many biological buffers and water. All liquids are completely miscible in water and biological buffers.

FIRE AND EXPLOSION HAZARDS

Not considered to be write hzard. At high concentrations the chemicals may emit toxic fumes. Such high concentrations are not normally found in a research laboratory.

EXTINGUISHING MEDIA: SPECIAL FIRE FIGHTING PRECAUTIONS:

Dry chemical powder or CO₂. Wear self-contained breathing apparatus and protective clothing to prevent contact with skin and eyes.

LABORATORIES, INC.

197 North Amphlett Blvd. San Mateo, CA 94401

Tel: 650-342-3296 Fax: 650-342-2648 Orders: 1-800-821-0044 (Outside CA only)

Tel: 650-342-3296 Fax: 650-342-2648 Orders: 1-800-821-0044 (Outside CA only)

NOTE: Most solutions contain less than 0.05% sodium azide as a preservative. Azide may react with lead and copper plumbing to form explosive metal azides. Flush with copious amounts of water when disposing material in the sink.

REACTIVITY DATA

STABILITY: HAZARDOUS POLYMER INCOMPATIBILITY:	ZATION:	Stable. Decomposition products are not known to be hazardous. Will NOT occur. Alcohols, strong bases and acids, strong oxidizing agents, and heat. (Lead and copper may react with sodium azide).
SPILL / LEAK PROCED MATERIAL RELEASE / SPILL:	Avoid contact w soaked in hou	with powder or liquid. Clean up spill with a paper towel sehold bleach. Do not allow solutions to dry on urfaces. Wash affected area with detergent after the area with bleach
WASTE DISPOSAL:	Incinerate, auto Local, State, an material involve	clave, or dispose of paper waste in accordance with all d Federal regulations. Due to the small quantities of ed these products are generally not considered to be azards. All of these proteins are fully biodegradable.

EMERGENCY FIRST AID PROCEDURES

May be harmful if swallowed, inhaled, or allowed to absorb through the skin. Wash contacted area with water for 15 minutes. If inhaled remove to fresh air. Report exposure to the appropriate safety official. Consult a physician if irritation occurs or if there is any indication of an allergic response, such as watering eyes, sneezing, or difficulty breathing.

SPECIAL HANDLING PRECAUTIONS

VENTILATION:	No special ventilation is required but it is recommended to handle these
	reagents in a fume hood when possible.
EYE PROTECTION:	Required. Goggles or safety glasses with a side shield are recommended.
RESPIRATORY PROTECTION:	Recommended as a safety precaution, specifically when working with powders. An approved respirator may be required for those individuals
PROTECTIVE GLOVES:	already known to be sensitive to these materials. Required when handling any of these materials.

SPECIAL PRECAUTIONS

This material is for research and experimental application only. It is not intended for food, drug, household, agricultural, or cosmetic use. All materials should be handled only by technically qualified individuals experienced with working with potentially hazardous chemicals. The above information is correct to the best of our knowledge. The user should make independent decisions regarding completeness of the information, based on all sources available. EY Laboratories, Inc. shall not be held liable for any damage resulting from handling or contact with the above product.
