

PRODUCT INFORMATION

Polyacrylamide Beads

Catalog Number:	PB-2102-2
Description:	Purified Succinyl <i>Triticum vulgare</i> (Succinyl WGA) linked to polyacrylamide beads (exclusion limit MW 150,000 daltons).
Lot Number:	
Volume Size:	2 ml settled beads.
Method of Conjugation:	Glutaraldehyde.
Carbohydrate Specificity:	(GlcNAc- β -(1,4)-GlcNAc) ₁₋₄ > β -GlcNAc>Neu5Ac.
Capacity:	2-2.5mg purified Succinyl WGA per 1ml of settled beads.
Storage Buffer:	0.01M Phosphate - 0.15M NaCl, pH 7.2-7.4. Contains 0.05% sodium azide as a preservative
Storage:	Store refrigerated at 5-8°C in Buffer. DO NOT FREEZE.
Stability:	The material is stable for several years when stored refrigerated with 0.05% sodium azide added as a preservative
Other Information:	Succinyl WG has hydrophobic properties and tends to aggregate upon standing. To get low aggregation, gently vortex for one minute before use.
Procedure for Use:	<ol style="list-style-type: none">1. Wash beads with Buffer of choice by centrifugation at 1000 xg for 2 minutes.2. Discard supernatant and resuspend in Buffer. Repeat 3-4 times.3. Add cells to solution and incubate with shaking for 30 minutes to 1 hour. Wash with Buffer as above.4. Use solution to remove cells from the beads.
Procedure for Gel Regeneration:	<ol style="list-style-type: none">1. Suspend the beads in 10mls of Storage Buffer containing 0.2M N-Acetylglucosamine. Gently vortex for 1 minute.2. Centrifuge at 1000 xg for 2 minutes.3. Discard the supernatant. Repeat steps 1-3 three more times.4. Finally, repeat the washing procedure 3-4 times using with the Storage Buffer.5. Store refrigerated in Storage Buffer with 0.05% Sodium azide as a preservative.

MATERIAL SAFETY DATA SHEET

Effective Date: March 31, 2006

Revision 4

Page 1 of 2

PRODUCT IDENTIFICATION

Name: Proteins, carbohydrates, and biotin immobilized on a support matrix of acrylamide or polygalactose.

Catalog Number (s): ABP-01, A-1102 to A-9000, MB-1104 to MB-9000, PB-1104 to PB-9000, PG-001 to PG-7011, PB-01 to PB-05, CG-001 to CG-092, AG-001 to AG-032, A-1001 to A-1004, CG-094 to CG-096.

Synonyms: Protein A, Avidin (egg white), D-Biotin, Lectins, Secondary Antibodies, Carbohydrates, Thyroglobulin, Fetuin, Hemoglobin, α -Lactalbumin, Porcine Stomach Mucin, Ovalbumin, Bovine Submaxillary Mucin, Transferrin, Myoglobin, Strept. Avidin, and 2-Iminobiotin immobilized on a polygalactose matrix or an acrylic (or polyacrylamide) matrix.

EMERGENCY INFORMATION

San Mateo, CA 94401

EMERGENCY PHONE:
650-342-3296

HAZARDOUS COMPONENTS

Specific protein(s) as listed on the vial label. The matrix itself is not known to be hazardous. The proteins are covalently attached to the beaded matrix and therefore present a hazard primarily through ingestion or injection. The biological activities of these chemicals will vary. It is possible that the immobilized material may leach off the beaded matrix during use. Care should be used when handling any of these reagents. All of these solutions contain at least 0.1%, but not greater than 1%, sodium azide as a preservative.

HEALTH HAZARD INFORMATION

EXPOSURE LIMITS: None established. The toxicological properties of these products have not been thoroughly investigated. Care should be taken when handling any of these materials.

EFFECTS OF OVEREXPOSURE: No effects of overexposure have been documented. The individual proteins and other ligands may cause allergic reactions in sensitive individuals. This is a problem primarily with material that leaches from the column through use. Local irritation is likely if eye contact occurs.

ROUTES OF EXPOSURE: Ingestion or injection of the beaded material are the primary routes of exposure. Contact with the eyes may also present a hazard.

PHYSICAL CHARACTERISTICS

APPEARANCE: Solution containing a maximum of 50% (v/v) of beaded matrix in buffer.

SOLUBILITY: Not applicable.

FIRE AND EXPLOSION HAZARDS**EXTINGUISHING MEDIA:****SPECIAL FIRE FIGHTING PRECAUTIONS:**

Not considered to be a fire hazard.

Water spray or CO₂.

None required.

NOTE: All solutions contain less than 1% sodium azide (w/v) as a preservative. Azide may react with lead and copper plumbing to form explosive metal azides. Flush with copious amounts of water when disposing material in the sink.

REACTIVITY DATA**STABILITY:**

Stable. Decomposition products are not known to be hazardous.

HAZARDOUS POLYMERIZATION:

Will NOT occur.

INCOMPATIBILITY:

None known. (Lead and copper may react with sodium azide).

SPILL / LEAK PROCEDURES**MATERIAL RELEASE / SPILL:**

Avoid contact with liquid. Clean up spill with a paper towel soaked in household bleach. Do not allow solutions to dry on environmental surfaces. Wash affected area with detergent after the area has been treated with bleach.

WASTE DISPOSAL:

Incinerate, autoclave, or dispose of paper waste in accordance with all Local, State, and Federal regulations. Due to the small quantities of material involved these products are generally not considered to be environmental hazards. All of these proteins are fully biodegradable.

EMERGENCY FIRST AID PROCEDURES

May be harmful if swallowed, injected, or allowed to contact the eyes. Wash contacted area with water for 15 minutes. If inhaled remove to fresh air. Report exposure to the appropriate safety official. Consult a physician if irritation occurs or if there is any indication of an allergic response, such as watering eyes, sneezing, or difficulty breathing. Any eye contact should be reported to a physician immediately.

SPECIAL HANDLING PRECAUTIONS**VENTILATION:**

No special ventilation is required but it is recommended to handle these reagents in a fume hood when possible.

EYE PROTECTION:

Required. Goggles or safety glasses with a side shield are Recommended

RESPIRATORY PROTECTION:

Not required unless the formation of aerosols is likely. An approved respirator may be required for those individuals already known to be sensitive to these materials.

PROTECTIVE GLOVES:

Required when handling any of these materials.

SPECIAL PRECAUTIONS

This material is for research and experimental application only. It is not intended for food, drug, household, agricultural, or cosmetic use. All materials should be handled only by technically qualified individuals experienced with working with potentially hazardous chemicals. The above information is correct to the best of our knowledge. The user should make independent decisions regarding completeness of the information, based on all sources available. EY Laboratories, Inc. shall not be held liable for any damage resulting from handling or contact with the above product.
